SeepThru ULTRA

RHIZOSOLUTIONS SURFACTANT TECHNOLOGY

SeepThru ULTRA is a new generation of soil surfactant technology developed for professional turf managers, maintaining high quality turf and playing surfaces. **SeepThru ULTRA** helps to provide uniform soil moisture distribution and increases plant root access to water in the root zone. **SeepThru ULTRA** helps pesticides reached their targets, thus increasing the effectiveness and availability of applied products. **SeepThru ULTRA** technology was developed by RhizoSolutions LLC in the United States of America.

RECOMMENDATIONS

TURF/SPORTS FIELD	APPLICATION RATE	SUGGESTION
Golf Greens and Fine Turf	Monthly Program Preventive: 12.5 L/ha in 800 L of water every 30 days or 6.25 L/ha in 800 L of water every 15 days.	Start program before stress occurs. Irrigate after application.
	Curative: 12.5 to 19.0 L/ha in 800 L of water and repeat as needed.	Treatment for LDS. Spray the targeted area and irrigate following application. Treatment for area infested with soil borne insect/nematodes. Tank mix with recommended insecticide or nematicide and irrigate at rate of 2 - 4 millimetres of water.
Fairways	6.25 L/ha in 800 L of water every 30 days.	Irrigate after application to move product into the root zone
Sports Turf	6.25 to 12.5 L/ha in 800 L of water every 30 days.	Irrigate after application to move product into the root zone
