# PIGMENT TECH

**Pigment Tech** is natural pigment for turf. It is suitable to improve the turf colour that match with the colour tone needed for specific turf species/variety. **Pigment Tech** can help to superficially cover up the uneven colour of the turf due to stress conditions & un-even fertiliser application. It can also be used to reverse the brown colour due to pest & disease incident or machinery failure. **Pigment Tech** can be applied using general spraying equipment such as knapsack spray or boom sprayer that available in the market. **Pigment Tech** has immediate availability to absorb in to the surface of the turf in just few minutes. Thus giving the assurance that the golfer shoes or trousers will not be stained. The turf which sprayed with **Pigment Tech** will last around 4 - 5 days after spray. It will gradually faded as the routine mowing taking place at daily basis.

**Pigment Tech** can be mixed with sand for the purpose of patching work such as repairing divot, The mixing ratio can be adjusted to match the turf colour. Each of the turf type requires different colour tone for effective superficial works.

**Pigment Tech** is a rescue approach for the course superintendent in the even where the turf condition was below expected quality. **Pigment Tech** is a rescue product should Course Superintendent need in the even where turf colour in adverse situation.

## Recommendation ;

Turf	Condition	Rate application	Method
Tif Eagle, Tif Dwarf Zoysia.	Un even colour	20 - 40 L / ha	Spraying. Spray volume 500 L / ha
	Patching works	0.5 - 1.0 ml / 1 kg sand	Mix thoroughly with sand at ration 0.5 -1.0 : 1 kg sand *wear protective gear when mixing
